

BUGATTI

PARTS AFTER SALES INTERNSHIP (M/F/D) — BG-VK/P

Contract : Internship

Start date : from 01.01.2025

Duration : 6 months

Location : Molsheim, France

REQUIREMENTS

- Advanced degree in logistics or supply chain
- Experience in the automotive sector is desirable

SKILLS

- General knowledge of logistics and more specifically warehousing
- Knowledge of the supply chain
- Very good knowledge of MS office
- French fluent and good knowledge of English
- Ability to find solutions
- Organizational and analytical skills

TASKS

- Help define the volumes required for the storage of spare parts, including the definition of the types of products to be stored (standard or non-standard), on existing stock as well as future models
- Define the typology and volumes of existing stock
- Draw up a long-term forecast including volumes, weights and types of item
- Define the best possible storage strategy for spare parts (location, separation, value, specificity)
- Participate in the call for tenders to extend the logistics storage area
- Take account of physical or virtual storage constraints (insurance, CO2, AEO, freight security, etc.)
- Provide a full analysis on the best harmonizing strategy for both Bugatti and Rimac storage locations
